Full Screen

The screenshot shows a database management tool interface. On the left, there is a sidebar with a tree view of the database schema, including tables like 'customers', 'carts', 'cart_items', 'excursions', and 'vacations'. The main area displays a SQL query that joins these tables to find specific order details. Below the query, the results are shown in a table format, matching the one in the 'Results' section. The interface includes various toolbars for editing, saving, and navigating through the data.
